

In order to get set up your WordPress (or any other type of websites), you're going to need two things:

- A domain name (a web address like achievherperfection.com)
- Hosting (a service that connects your site to the internet like Bluehost)

The wordpress platform is free itself but a domain names will run you roughly \$10/year. If you don't find the right domain name, no worries that's just one less donut or latte in the morning!

Without web hosting, your blog can't be seen online. Without a domain name, your blog won't have an address. The two are inseparable.

When you get a domain name, you'll also get a personal email account(s): you@yoursite.com – way more professional than a generic Gmail or Yahoo address.

You can get started now and start your web hosting through my affiliate link <https://www.bluehost.com//track/ciaedwards>

They are really good about website transfers as well if you are finally making the decision to switch to web hosting.

Select a Plan that best suits your needs.

select your plan

	basic	plus	prime recommended
	normally \$7.99 \$2.75* per month	normally \$10.99 \$5.45* per month	normally \$14.99 \$5.45* per month
	select	select	select
websites	1	unlimited	unlimited
website space	50 GB	unmetered	unmetered
bandwidth	unmetered	unmetered	unmetered
performance	Standard	Standard	Standard
included domains	1	1	1
parked domains	5	unlimited	unlimited

If you've already got a domain name, just enter it in and click "Next" on the "I have a domain name" form or choose it later.

CUSTOMIZATIONS & INSTALL

There are two possible ways to install WordPress, one MUCH easier than the other.

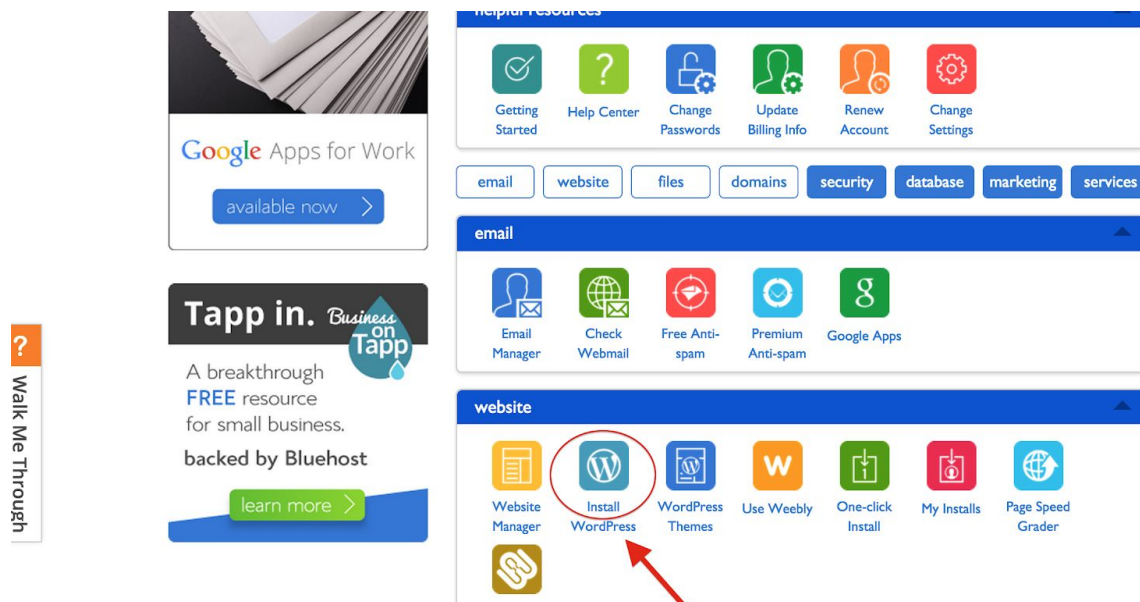

1. TO CREATE A WEBSITE WITH WORDPRESS (OR JOOMLA & DRUPAL), USE ONE CLICK INSTALLATION:

Almost every reliable and well-established hosting company has integrated 1-click-installation for WordPress, which makes getting going a snap.

If you signed up with bluehost or any other similar hosting company, you should find your “1-click-installation” in your account control panel.

Here are the steps you should follow (should be similar/same on all the major web hosting companies):

1. Log in to your hosting account.
2. Go to your control panel.
3. Look for the “WordPress” or “Website” icon.
4. Choose the domain where you want to install your website.
5. Click the “Install Now” button and you will get access to your new WordPress website.

Choose the “do it yourself” version and click the “Install” button.
